Hi Martina, I deleted the double post :-)

As que finalmente me ha recetado dostinex, un medicamento que retira la leche, que me vende muy apretado el pecho, un diurético; tico e ibuprofeno.

In the 404 patients who had both ED and BPH at baseline, changes in erectile function were assessed as key secondary endpoints using the EF domain of the IIEF questionnaire.

But that approach is an oversimplification since most of today’s owners do not know a world without lasix and rely on their trainer for guidance on the issue.
